

## **ABOUT US:**

Assam Solar is an enterprise established in 2016 with its head office in Nagaon district of Assam (INDIA) and operating its business across North Eastern States of India and expanding.

Assam Solar is a team of highly skilled and qualified members delivering a high-class service, values and companionship to its customers.

## **VISION:**

To create awareness and encourage people to switch to green energy consumption in order to make the world a healthy and better place to live in.

## **MISSION:**

To provide the most compelling value in the solar energy industry. Value, as defined by our customers, means designing and installing the highest quality solar energy systems, on time, safely, with high customer satisfaction, at a low cost.

## **WHY SOLAR?**

As we all know Solar Energy refers to the energy generated from the Sun. Whether you realize it or not, the sun already powers our planet, providing the necessary energy to keep our environment and population growing. Let us know some of the reasons to switch to Solar Energy:

### **❖ HUGE ECONOMIC SAVING:**

- Up to 90% savings on your electricity bills.
- 24 hrs uninterrupted power supply.

❖ **QUICK RETURN ON INVESTMENT:**

- Payback period is approx. 4-5 years.
- Next 20 years of virtually free electricity supply.

❖ **ZERO ENERGY PRODUCTION COST:**

- Once installed, solar energy systems operate free of cost.
- Continuous uninterrupted energy supply for your requirements.

❖ **GUARANTEED PERFORMANCE:**

- Solar panel manufacturers provide 25 years of guarantee. Industry std. guarantees 80% performance after 25 years.

❖ **SOLAR IS A SECURE INVESTMENT:**

- Electricity cost is on a continual upward trend.
- With your solar energy & simple math you will be the winner for next 20 years.

❖ **LOW MAINTENANCE COST:**

- Solar panels are virtually maintenance free.
- Just keep cleaning your panels periodically.

❖ **ENVIRONMENT SAFETY:**

- Adopt solar energy, save mother earth.
- With solar, you will leave behind a better world for your child.

## **OUR PRODUCTS and SERVICES**

1. **Solar Panels:** A solar panel receives energy from the sun and converts the solar energy or light energy into electrical energy. Being environment friendly in nature, solar panels collect the solar energy which is available in abundance on our planet and convert it using the advanced technology developed by human beings.
2. **Street Lights:** Solar Street Lights are the light sources mounted on a pole which has an independent setup with solar panels, LED light, battery and sensor.
3. **Solar water heater:** A solar water heater is a solar device that heats water using solar energy for domestic or industrial purpose. It uses the sunlight to heat the water during the day. This hot water is stored inside an insulated solar hot water tank for use whenever required. It is among the most cost-effective uses of solar energy.
4. **Agricultural Water Pump:** Solar Agricultural Water Pump converts solar energy into electricity to run the pumping system which reduces the heavy electricity bills and the heavy pollution caused by the diesel pumps. The solar water pump helps draw surface or ground water out for irrigational purpose.
5. **Installation Kit:** Earthing, DC cables, DC MCB, DCDB Box, ACDB Box, MC4 Connector.
6. **Rooftop projects** for residential and commercial system installation.
7. **Maintenance**
8. **Consultancy**
